

Smart Contactless Sanitizer Dispenser

Designed To Kill Covid-19 Effectively

Stay Home

Stay Safe

Save Lives

What is Smart Contactless Sanitizer Dispenser ?

- Fully Automated & Contactless
- Integrated with 4 Smart Sensors
- 2 x Wide Angle Nozzle for Maximum Coverage
- Prevent Virus Travel in Aerosols
- Sleek, Modern & Compact Design
- Safe Human Resource
- Cable Free (Approx 4000 times / set of AA battery)
- Flexible mounting options

Competitor's Analysis

- Not fully automated
- Narrow spray angle with single nozzle
- Bulky / Conventional design

Conventional Sanitizer Methods

Heat reduces effectiveness

Always Forget! Not Enough!

Tissue unable to kill gems/ virus

Bulky with high labour cost

Our Smart Features

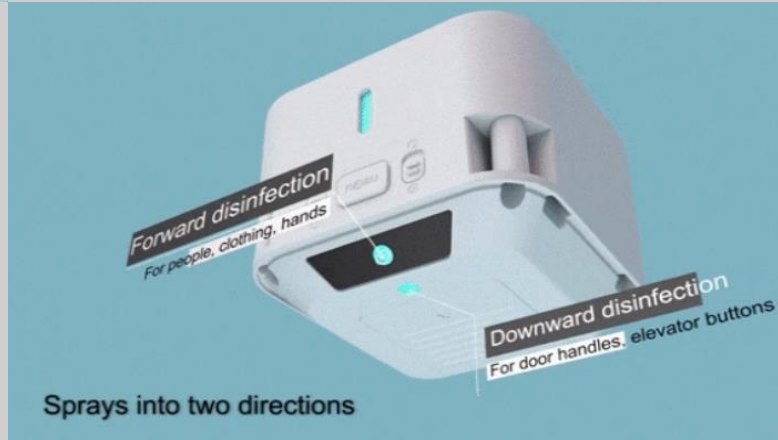

Smart sensor

Automatic smart induction operation, only need to put your hand under it, it will automatically spray disinfectant according to your hand.

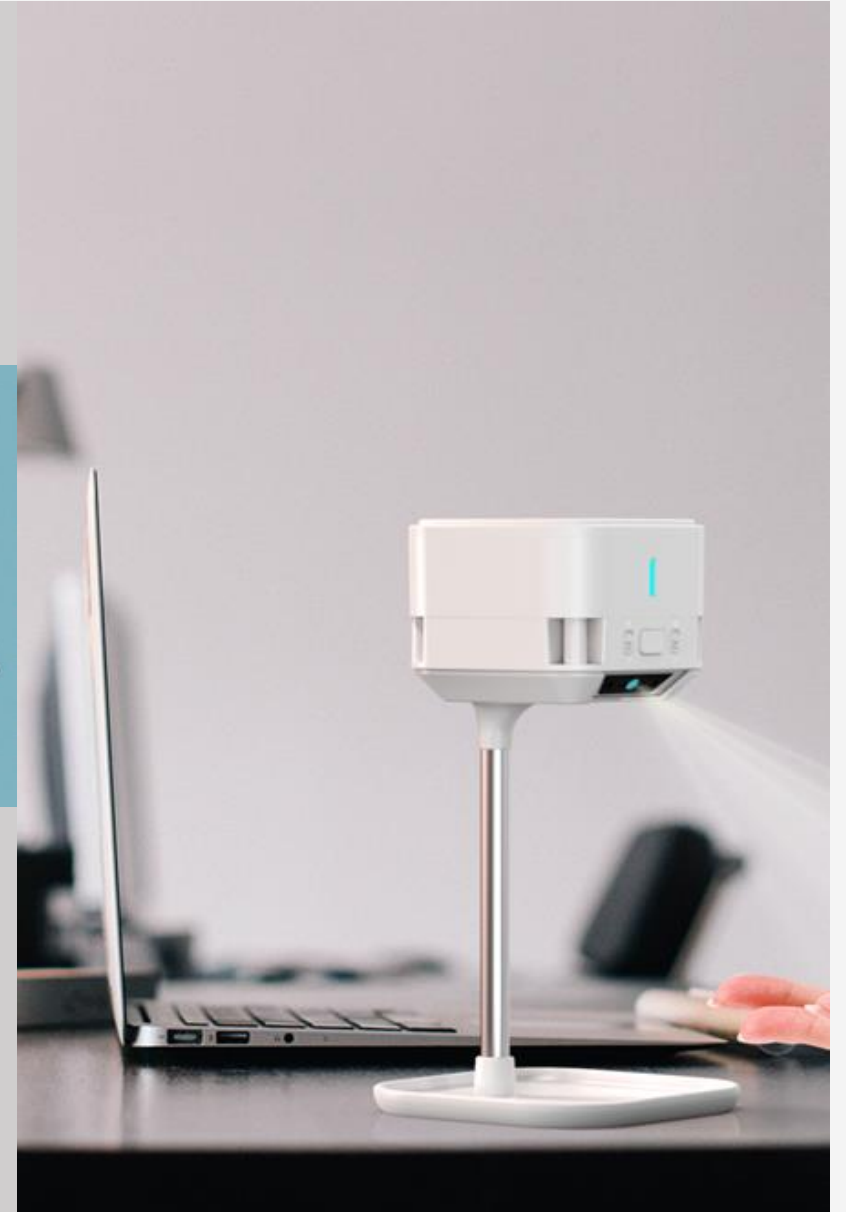

Dual nozzle

Dual nozzle, NOMU Infrared Sanitizer was designated a disinfectant water spray outlet on the side and bottom. The side nozzle is mainly used for disinfection of moving objects such as human hands and courier packaging. The downward nozzle is mainly for the position of the door handle, and back up for side nozzle.

Customize spray metering

Volume adjustment design, you can adjust the spraying volume according to your needs, no matter filled with a pot of disinfectant, or large dose. This device can also be sprayed 200 times, small volume spray can be sprayed 300 times, It is enough to meet weekly spray disinfection need.

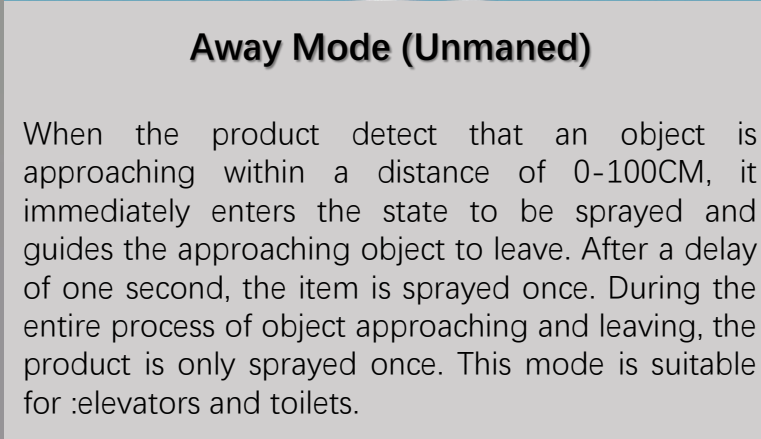

Our Operation Modes

People Mode

In the people mode, when the product detect that an object is approaching within a distance of 0-50CM, it will immediately spray disinfectant, from the object approaching to leaving, only spray once.

Away Mode (Unmaned)

When the product detect that an object is approaching within a distance of 0-100CM, it immediately enters the state to be sprayed and guides the approaching object to leave. After a delay of one second, the item is sprayed once. During the entire process of object approaching and leaving, the product is only sprayed once. This mode is suitable for elevators and toilets.

Away mode

1m/3ft range

Sprays once more when everyone has left the room

Manual Adjustment Mode

Users can also manually spray an unlimited number of times according to your needs.

Spray time can be set

to 1 or 2 seconds

5

ในกรณีเกิดเพลิงไหม้
โปรดใช้บันไดเท่านั้น

In case of fire, use stairs only

Scenario 9

In-Car Protection

Scenario 10

Taxi / Chauffeur

A Safer Journey with Us

The image shows the interior of a public transport vehicle, likely a train or MRT. A series of grey, triangular hanging handles are visible, receding into the distance. In the foreground, a white rectangular sign is attached to a black vertical bar. The sign has the text 'SEPATU DINGIN' and 'VG KEMBALI' in white on a dark background. Below this, there is smaller text in Indonesian. The background is slightly blurred, showing the interior structure of the vehicle, including overhead lighting and other passengers or equipment.
